Sustainable Energy Community:

Climate Change
will badly affect the lives of future generations.
Do you know that you can improve the comfort
level in your home and at the same time save
money and help to reduce the effects of Climate
Change? By improving the insulation level of

your house, installing more energy efficient
heating systems and renewable energy devices
such as solar heating or solar electric units you
can reduce your electricity and fuel bills.

Louisburgh and Killeen Sustainable Energy
Community group have prepared an Energy
Master Plan to reduce the energy usage in our
Parish. Generous grants are available from the
Government for energy reduction schemes. We
are preparing a list of projects for which we will
apply for these grants. To be part of our first
community initiative, don't delay. The list of
interested people and homes is getting close to
closure.

Campbell at 087 284 7695.
